

## **OPERATIONAL ANALYSIS OF WEEKLY INFORMATION ON COMMUNICABLE DISEASES IN BULGARIA**

### **Week 12 (17.03.2025 – 23.03.2025)**

#### **1. *Salmonellosis***

The number of reported cases of Salmonellosis during week 12 of 2025 is 11. The deviation from the previous week is (3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 121. For the same period of the previous year the number of reported cases is 82. The deviation from the previous year is (39).

#### **2. *Lyme disease***

The number of reported cases of Lyme disease during week 12 of 2025 is 5. The deviation from the previous week is (-2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 39. For the same period of the previous year the number of reported cases is 21. The deviation from the previous year is (18).

#### **3. *Gastroenteritis, enterocolitis***

The number of reported cases of Gastroenteritis, enterocolitis during week 12 of 2025 is 159. The deviation from the previous week is (15).

The reported cases are classified as: 62 possible, 89 probable and 8 confirmed.

From the beginning of the year the number of reported cases is 1647. For the same period of the previous year the number of reported cases is 1443. The deviation from the previous year is (204).

#### **4. *E. coli infection – escherichiosis (E.coli)***

The number of reported cases of E. coli infection – escherichiosis (E.coli) during week 12 of 2025 is 6. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 60. For the same period of the previous year the number of reported cases is 57. The deviation from the previous year is (3).

#### **5. *Scarlet fever***

The number of reported cases of Scarlet fever during week 12 of 2025 is 94. The deviation from the previous week is (-3).

The reported cases are classified as: 41 possible, 40 probable and 13 confirmed.

From the beginning of the year the number of reported cases is 1218. For the same period of the previous year the number of reported cases is 3403. The deviation from the previous year is (-2185).

#### **6. *Varicella***

The number of reported cases of Varicella during week 12 of 2025 is 651. The deviation from the previous week is (70).

The reported cases are classified as: 67 possible, 519 probable and 65 confirmed.

From the beginning of the year the number of reported cases is 7737. For the same period of the previous year the number of reported cases is 9306. The deviation from the previous year is (-1569).

**7. Shigellosis**

The number of reported cases of Shigellosis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-6).

**8. Mumps**

The number of reported mumps cases during week No 12 of year 2025 is 0. The deviation from the previous week is (0).

From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-3).

**9. Pertussis**

The number of reported cases of Pertussis during week 12 of 2025 is 4. The deviation from the previous week is (3).

The reported cases are classified as: 1 possible and 3 confirmed.

From the beginning of the year the number of reported cases is 40. For the same period of the previous year the number of reported cases is 66. The deviation from the previous year is (-26).

**10. Leptospirosis**

The number of reported cases of Leptospirosis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**11. Botulism**

The number of reported cases of Botulism during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**12. Yersiniosis**

The number of reported cases of Yersiniosis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (-3).

**13. Campylobacteriosis**

The number of reported cases of Campylobacteriosis during week 12 of 2025 is 2. The deviation from the previous week is (-2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 45. For the same period of the previous year the number of reported cases is 54. The deviation from the previous year is (-9).

**14. Typhoid fever**

The number of reported cases of Typhoid fever during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**15. Legionnaires` disease**

The number of reported cases of Legionnaires` disease during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3.The deviation from the previous year is (-1).

**16. Rubella**

The number of reported rubella cases during week No 12 of year 2025 is 0. The deviation from the previous week is (0).

The reported cases are classified as: 0 possible, 0 probable and 0 confirmed.

From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**17. Congenital rubella**

The number of reported cases of Congenital rubella during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0.The deviation from the previous year is (0).

**18. Viral meningitis and meningoencephalitis**

The number of reported cases of Viral meningitis and meningoencephalitis during week 12 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as probable.

From the beggning of the year the number of reported cases is 22. For the same period of the previous year the number of reported cases is 22.The deviation from the previous year is (0).

**19. Crimean-Congo haemorrhagic fever**

The number of reported cases of Crimean-Congo haemorrhagic fever during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0.The deviation from the previous year is (0).

**20. Mediterranean spotted fever (Boutonneuse fever)**

The number of reported cases of Mediterranean spotted fever (Boutonneuse fever) during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0.The deviation from the previous year is (0).

**21. Meningococcal infection**

The number of reported cases of Meningococcal infection during week 12 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 7. For the same period of the previous year the number of reported cases is 3.The deviation from the previous year is (4).

**22. Listeriosis**

The number of reported cases of Listeriosis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 4.The deviation from the previous year is (-2).

**23. Brucellosis**

The number of reported cases of Brucellosis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

**24. Tularemia**

The number of reported cases of Tularemia during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**25. Acute viral hepatitis ABCDEN**

The number of reported cases of Acute viral hepatitis ABCDEN during week 12 of 2025 is 32. The deviation from the previous week is (13).

The reported cases are classified as: 2 possible, 5 probable and 25 confirmed.

From the beginning of the year the number of reported cases is 245. For the same period of the previous year the number of reported cases is 145. The deviation from the previous year is (100).

**26. Hemorrhagic fever with renal syndrome**

The number of reported cases of Hemorrhagic fever with renal syndrome during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**27. Q fever**

The number of reported cases of Q fever during week 12 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (1).

**28. Ornithosis**

The number of reported cases of Ornithosis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**29. Tetanus**

The number of reported cases of Tetanus during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**30. Anthrax**

The number of reported cases of Anthrax during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**31. *Pneumococcal meningitis***

The number of reported cases of Pneumococcal meningitis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 7. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-1).

**32. *Streptococcal meningitis***

The number of reported cases of Streptococcal meningitis during week 12 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

**33. *Haemophilus influenzae meningitis***

The number of reported cases of Haemophilus influenzae meningitis during week 12 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

**34. *Bacterial meningitis (other bacteria)***

The number of reported cases of Bacterial meningitis (other bacteria) during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 15. For the same period of the previous year the number of reported cases is 12. The deviation from the previous year is (3).

**35. *Rotavirus gastroenteritis***

The number of reported cases of Rotavirus gastroenteritis during week 12 of 2025 is 17. The deviation from the previous week is (-5).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 244. For the same period of the previous year the number of reported cases is 94. The deviation from the previous year is (150).

**36. *Measles***

The number of reported measles cases during week No 12 of year 2025 is 0. The deviation from the previous week is (-1). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

**37. *SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)***

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

**38. *West Nile virus***

The number of reported cases of West Nile virus during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**39. Tick-borne Encephalitis**

The number of reported cases of Tick-borne Encephalitis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**40. Pneumococcal invasive disease**

The number of reported cases of Pneumococcal invasive disease during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**41. Variant of Creutzfeldt-Jakob**

The number of reported cases of Variant of Creutzfeldt-Jakob during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**42. COVID-19**

The number of reported cases of COVID-19 during week 12 of 2025 is 5. The deviation from the previous week is (-5).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 248. For the same period of the previous year the number of reported cases is 5339. The deviation from the previous year is (-5091).

**43. Lyme neuroborreliosis**

The number of reported cases of Lyme neuroborreliosis during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**44. Monkeypox**

The number of reported cases of Monkeypox during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

**45. Dengue**

The number of reported cases of Dengue during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

**46. Cholera**

The number of reported cases of Cholera during week 12 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**47. HIV**

The number of reported cases of HIV during week 12 of 2025 is 6. The deviation from the previous week is (-1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 70. For the same period of the previous year the number of reported cases is 54. The deviation from the previous year is (16).

**48. Gonorrhea**

The number of reported cases of Gonorrhea during week 12 of 2025 is 2. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 16. For the same period of the previous year the number of reported cases is 19. The deviation from the previous year is (-3).

**49. Chlamydial Infection**

The number of reported cases of Chlamydial Infection during week 12 of 2025 is 6. The deviation from the previous week is (5).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 35. For the same period of the previous year the number of reported cases is 19. The deviation from the previous year is (16).

**50. Syphilis**

The number of reported cases of Syphilis during week 12 of 2025 is 7. The deviation from the previous week is (-4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 95. For the same period of the previous year the number of reported cases is 94. The deviation from the previous year is (1).

**51. Congenital Syphilis**

The number of reported cases of Congenital Syphilis during week 12 of 2025 is 0. The deviation from the previous week is (-3). From the beginning of the year the number of reported cases is 9. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (5).

Регистрирани случаи на Колиентерити (ешерихиози) по седмици в Република България  
Reported number of cases of E. coli infection – escherichiosis (E.coli) by weeks in Bulgaria

Регистрирани случаи на COVID-19 по седмици в Република България  
Reported number of cases of COVID-19 by weeks in Bulgaria

Регистрирани случаи на Дизентерия (шигелоза) по седмици в Република България  
Reported number of cases of Shigellosis by weeks in Bulgaria

Регистрирани случаи на Гастроентерит, ентероколит по седмици в Република България  
Reported number of cases of Gastroenteritis, enterocolitis by weeks in Bulgaria

Регистрирани случаи на Остър вирусен хепатит ABCDE по седмици в Република България  
Reported number of cases of Acute viral hepatitis ABCDEN by weeks in Bulgaria

Регистрирани случаи на HIV по седмици в Република България  
Reported number of cases of HIV by weeks in Bulgaria

Регистрирани случаи на Лаймска борелиоза по седмици в Република България  
Reported number of cases of Lyme disease by weeks in Bulgaria

Регистрирани случаи на Коклюш по седмици в Република България  
Reported number of cases of Pertussis by weeks in Bulgaria

Регистрирани случаи на Салмонелоза по седмици в Република България  
Reported number of cases of Salmonellosis by weeks in Bulgaria

Регистрирани случаи на Скарлатина по седмици в Република България  
Reported number of cases of Scarlet fever by weeks in Bulgaria

Регистрирани случаи на Варицела по седмици в Република България  
Reported number of cases of Varicella by weeks in Bulgaria

Регистрирани случаи на Вирусни менингити и менингоенцефалити по седмици в Република България  
Reported number of cases of Viral meningitis and meningoencephalitis by weeks in Bulgaria
