

## **OPERATIONAL ANALYSIS OF WEEKLY INFORMATION ON COMMUNICABLE DISEASES IN BULGARIA**

**Week 17 (21.04.2025 – 27.04.2025)**

### **1. Salmonellosis**

The number of reported cases of Salmonellosis during week 17 of 2025 is 15. The deviation from the previous week is (6).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 179. For the same period of the previous year the number of reported cases is 131. The deviation from the previous year is (48).

### **2. Lyme disease**

The number of reported cases of Lyme disease during week 17 of 2025 is 6. The deviation from the previous week is (4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 62. For the same period of the previous year the number of reported cases is 31. The deviation from the previous year is (31).

### **3. Gastroenteritis, enterocolitis**

The number of reported cases of Gastroenteritis, enterocolitis during week 17 of 2025 is 180. The deviation from the previous week is (4).

The reported cases are classified as: 58 possible, 114 probable and 8 confirmed.

From the beggning of the year the number of reported cases is 2474. For the same period of the previous year the number of reported cases is 2206. The deviation from the previous year is (268).

#### 4. *E. coli* infection – escherichiosis (*E.coli*)

The number of reported cases of *E. coli* infection – escherichiosis (*E.coli*) during week 17 of 2025 is 3. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 75. For the same period of the previous year the number of reported cases is 81. The deviation from the previous year is (-6).

#### 5. Scarlet fever

The number of reported cases of Scarlet fever during week 17 of 2025 is 74. The deviation from the previous week is (-40).

The reported cases are classified as: 25 possible, 35 probable and 14 confirmed.

From the beggning of the year the number of reported cases is 1700. For the same period of the previous year the number of reported cases is 5085. The deviation from the previous year is (-3385).

6. Varicella

The number of reported cases of Varicella during week 17 of 2025 is 633. The deviation from the previous week is (219).  
The reported cases are classified as: 74 possible, 470 probable and 89 confirmed.  
From the beggning of the year the number of reported cases is 10611. For the same period of the previous year the number of reported cases is 13483.The deviation from the previous year is (-2872).

7. Shigellosis

The number of reported cases of Shigellosis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 6. For the same period of the previous year the number of reported cases is 10.The deviation from the previous year is (-4).

## 8. Mumps

The number of reported mumps cases during week No 17 of year 2025 is 1. The deviation from the previous week is (1). The reported case is classified as possible. From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-7).

## 9. Pertussis

The number of reported cases of Pertussis during week 17 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 47. For the same period of the previous year the number of reported cases is 525. The deviation from the previous year is (-478).

## 10. Leptospirosis

The number of reported cases of Leptospirosis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

## 11. Botulism

The number of reported cases of Botulism during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

## 12. Yersiniosis

The number of reported cases of Yersiniosis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-4).

## 13. Campylobacteriosis

The number of reported cases of Campylobacteriosis during week 17 of 2025 is 13. The deviation from the previous week is (11).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 73. For the same period of the previous year the number of reported cases is 79. The deviation from the previous year is (-6).

#### 14. Typhoid fever

The number of reported cases of Typhoid fever during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

#### 15. Legionnaires` disease

The number of reported cases of Legionnaires` disease during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

#### 16. Rubella

The number of reported rubella cases during week No 17 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### 17. Congenital rubella

The number of reported cases of Congenital rubella during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### 18. Viral meningitis and meningoencephalitis

The number of reported cases of Viral meningitis and meningoencephalitis during week 17 of 2025 is 2. The deviation from the previous week is (-1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 32. For the same period of the previous year the number of reported cases is 28. The deviation from the previous year is (4).

Регистрирани случаи на Вирусни менингити и менингоенцефалити по седмици в Република България  
Reported number of cases of Viral meningitis and meningoencephalitis by weeks in Bulgaria

#### 19. Crimean-Congo haemorrhagic fever

The number of reported cases of Crimean-Congo haemorrhagic fever during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**20. Mediterranean spotted fever (*Boutonneuse fever*)**

The number of reported cases of Mediterranean spotted fever (*Boutonneuse fever*) during week 17 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (-1).

**21. Meningococcal infection**

The number of reported cases of Meningococcal infection during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (7).

**22. Listeriosis**

The number of reported cases of Listeriosis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 5. The deviation from the previous year is (-3).

**23. Brucellosis**

The number of reported cases of Brucellosis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

**24. Tularaemia**

The number of reported cases of Tularaemia during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**25. Acute viral hepatitis ABCDEN**

The number of reported cases of Acute viral hepatitis ABCDEN during week 17 of 2025 is 29. The deviation from the previous week is (1).

The reported cases are classified as: 5 possible, 2 probable and 22 confirmed.

From the beggning of the year the number of reported cases is 392. For the same period of the previous year the number of reported cases is 209. The deviation from the previous year is (183).

Регистрирани случаи на Остър вирусен хепатит ABCDE по седмици в Република България  
Reported number of cases of Acute viral hepatitis ABCDEN by weeks in Bulgaria

**26. Hemorrhagic fever with renal syndrome**

The number of reported cases of Hemorrhagic fever with renal syndrome during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**27. Q fever**

The number of reported cases of Q fever during week 17 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 16. For the same period of the previous year the number of reported cases is 12. The deviation from the previous year is (4).

**28. Ornithosis**

The number of reported cases of Ornithosis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**29. Tetanus**

The number of reported cases of Tetanus during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**30. Anthrax**

The number of reported cases of Anthrax during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**31. Pneumococcal meningitis**

The number of reported cases of Pneumococcal meningitis during week 17 of 2025 is 2. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 13. For the same period of the previous year the number of reported cases is 11. The deviation from the previous year is (2).

**32. Streptococcal meningitis**

The number of reported cases of Streptococcal meningitis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

**33. Haemophilus influenzae meningitis**

The number of reported cases of Haemophilus influenzae meningitis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

**34. Bacterial meningitis (other bacteria)**

The number of reported cases of Bacterial meningitis (other bacteria) during week 17 of 2025 is 0. The deviation from the previous week is (-2). From the beginning of the year the number of reported cases is 22. For the same period of the previous year the number of reported cases is 19. The deviation from the previous year is (3).

**35. Rotavirus gastroenteritis**

The number of reported cases of Rotavirus gastroenteritis during week 17 of 2025 is 15. The deviation from the previous week is (3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 322. For the same period of the previous year the number of reported cases is 148. The deviation from the previous year is (174).

**36. Measles**

The number of reported measles cases during week No 17 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

**37. SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)**

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**38. West Nile virus**

The number of reported cases of West Nile virus during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**39. Tick-borne Encephalitis**

The number of reported cases of Tick-borne Encephalitis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**40. Pneumococcal invasive disease**

The number of reported cases of Pneumococcal invasive disease during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**41. Variant of Creutzfeldt-Jakob**

The number of reported cases of Variant of Creutzfeldt-Jakob during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

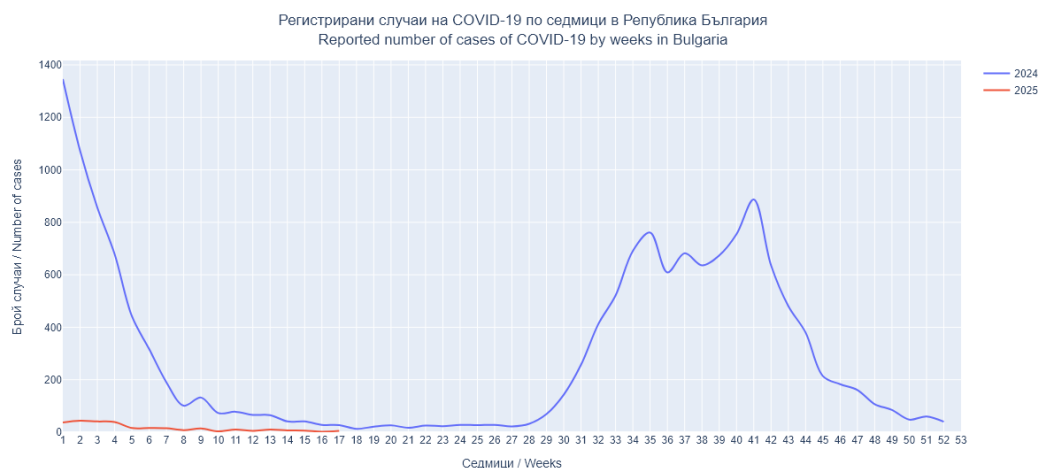

## 42. COVID-19

The number of reported cases of COVID-19 during week 17 of 2025 is 5. The deviation from the previous week is (3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 278. For the same period of the previous year the number of reported cases is 5551. The deviation from the previous year is (-5273).

## 43. Lyme neuroborreliosis

The number of reported cases of Lyme neuroborreliosis during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

## 44. Monkeypox

The number of reported cases of Monkeypox during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

## 45. Denga

The number of reported cases of Denga during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

## 46. Cholera

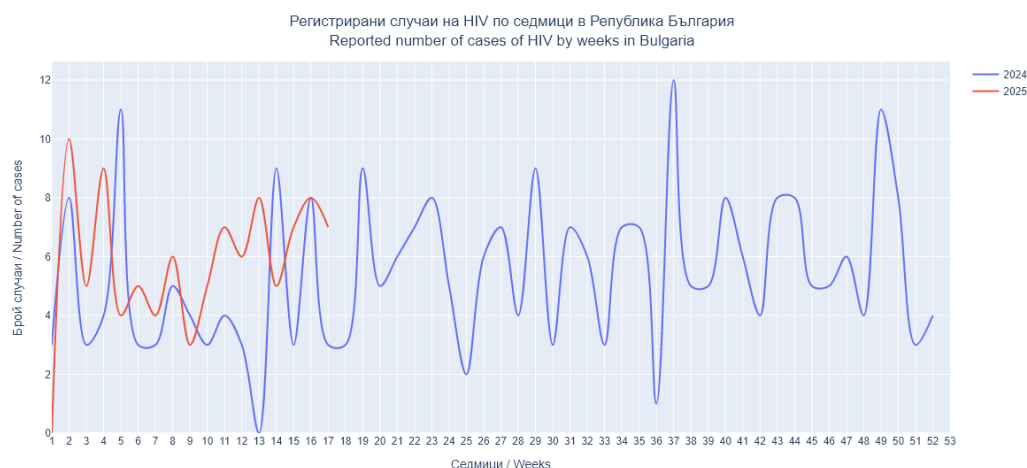

The number of reported cases of Cholera during week 17 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

## 47. HIV

The number of reported cases of HIV during week 17 of 2025 is 7. The deviation from the previous week is (-1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 105. For the same period of the previous year the number of reported cases is 77. The deviation from the previous year is (28).

#### 48. Gonorrhea

The number of reported cases of Gonorrhea during week 17 of 2025 is 1. The deviation from the previous week is (-2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 26. For the same period of the previous year the number of reported cases is 31. The deviation from the previous year is (-5).

#### 49. Chlamydial Infection

The number of reported cases of Chlamydial Infection during week 17 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 45. For the same period of the previous year the number of reported cases is 31. The deviation from the previous year is (14).

#### 50. Syphilis

The number of reported cases of Syphilis during week 17 of 2025 is 3. The deviation from the previous week is (-2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 123. For the same period of the previous year the number of reported cases is 131. The deviation from the previous year is (-8).

#### 51. Congenital Syphilis

The number of reported cases of Congenital Syphilis during week 17 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 12. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (6).
