The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 196. For the same period of the previous year the number of reported cases is 135. The deviation from the previous year is (61).

### 2. Lyme disease

The number of reported cases of Lyme disease during week 18 of 2025 is 6. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 68. For the same period of the previous year the number of reported cases is 36. The deviation from the previous year is (32).

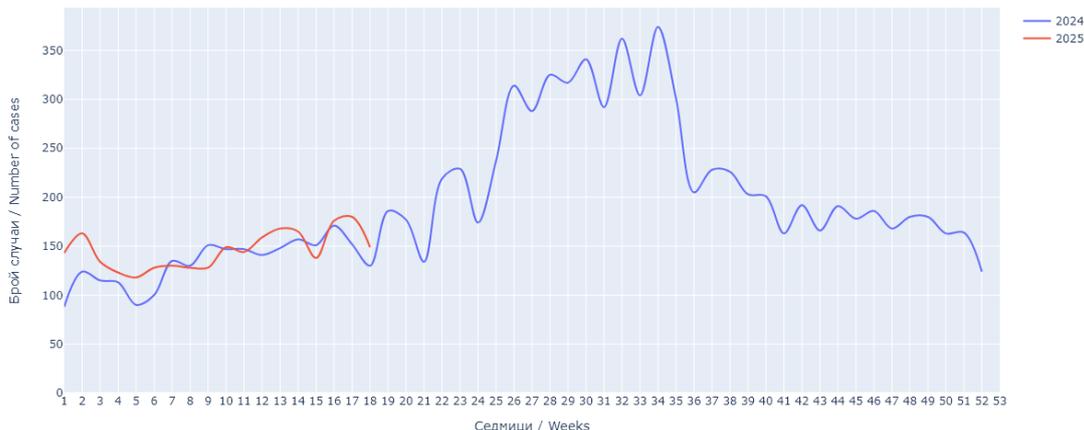

### 3. Gastroenteritis, enterocolitis

The number of reported cases of Gastroenteritis, enterocolitis during week 18 of 2025 is 149. The deviation from the previous week is (-31).

The reported cases are classified as: 66 possible, 72 probable and 11 confirmed.

From the beginning of the year the number of reported cases is 2623. For the same period of the previous year the number of reported cases is 2318. The deviation from the previous year is (305).

Регистрирани случаи на Гастроентерит, ентероколит по седмици в Република България  
Reported number of cases of Gastroenteritis, enterocolitis by weeks in Bulgaria

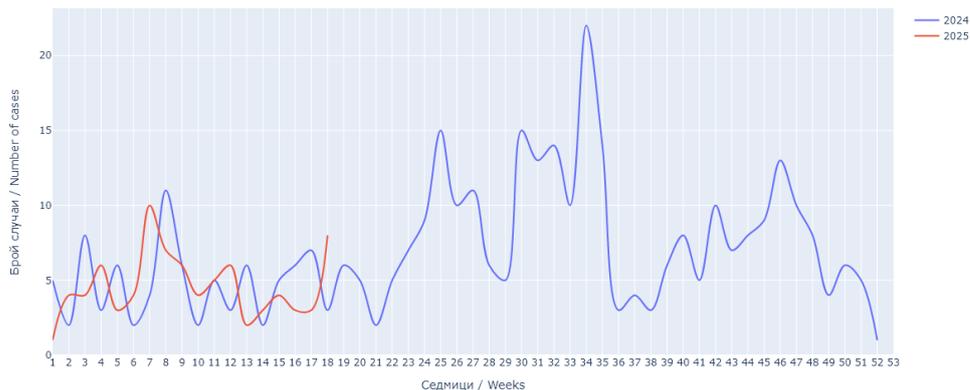

### 4. E. coli infection – escherichiosis (E.coli)

The number of reported cases of E. coli infection – escherichiosis (E.coli) during week 18 of 2025 is 8. The deviation from the previous week is (5).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 83. For the same period of the previous year the number of reported cases is 84. The deviation from the previous year is (-1).

Регистрирани случаи на Колиентерити (ешерихиози) по седмици в Република България  
Reported number of cases of E. coli infection – escherichiosis (E.coli) by weeks in Bulgaria

### 5. Scarlet fever

The number of reported cases of Scarlet fever during week 18 of 2025 is 100. The deviation from the previous week is (26).

The reported cases are classified as: 33 possible, 44 probable and 23 confirmed.

From the beginning of the year the number of reported cases is 1800. For the same period of the previous year the number of reported cases is 5346. The deviation from the previous year is (-3546).

Регистрирани случаи на Скарлатина по седмици в Република България  
Reported number of cases of Scarlet fever by weeks in Bulgaria

## 6. Varicella

The number of reported cases of Varicella during week 18 of 2025 is 575. The deviation from the previous week is (-58).

The reported cases are classified as: 50 possible, 481 probable and 44 confirmed.

From the beginning of the year the number of reported cases is 11186. For the same period of the previous year the number of reported cases is 13978. The deviation from the previous year is (-2792).

Регистрирани случаи на Варицела по седмици в Република България  
Reported number of cases of Varicella by weeks in Bulgaria

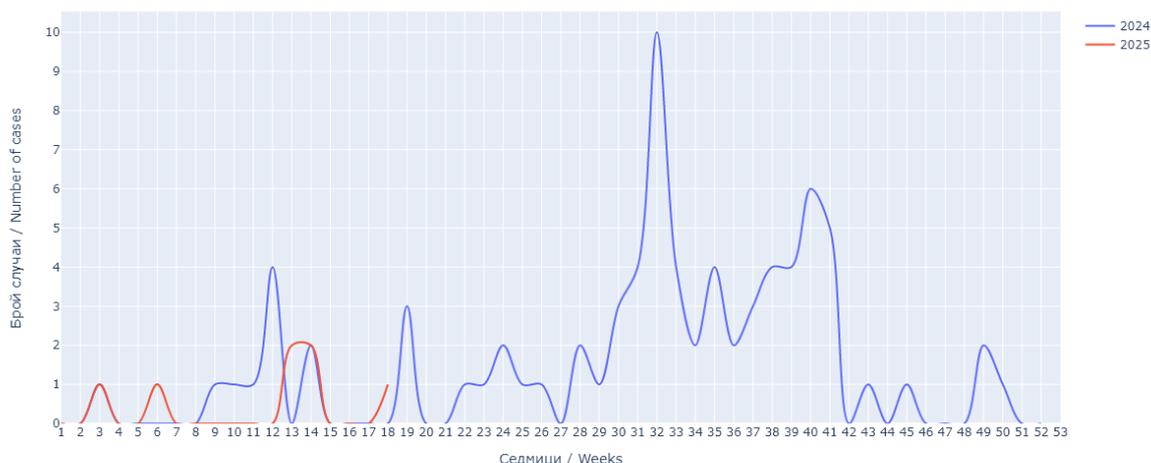

## 7. Shigellosis

The number of reported cases of Shigellosis during week 18 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 7. For the same period of the previous year the number of reported cases is 10. The deviation from the previous year is (-3).

Регистрирани случаи на Дизентерия (шигелоза) по седмици в Република България  
Reported number of cases of Shigellosis by weeks in Bulgaria

### 8. Mumps

The number of reported mumps cases during week No 18 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-8).

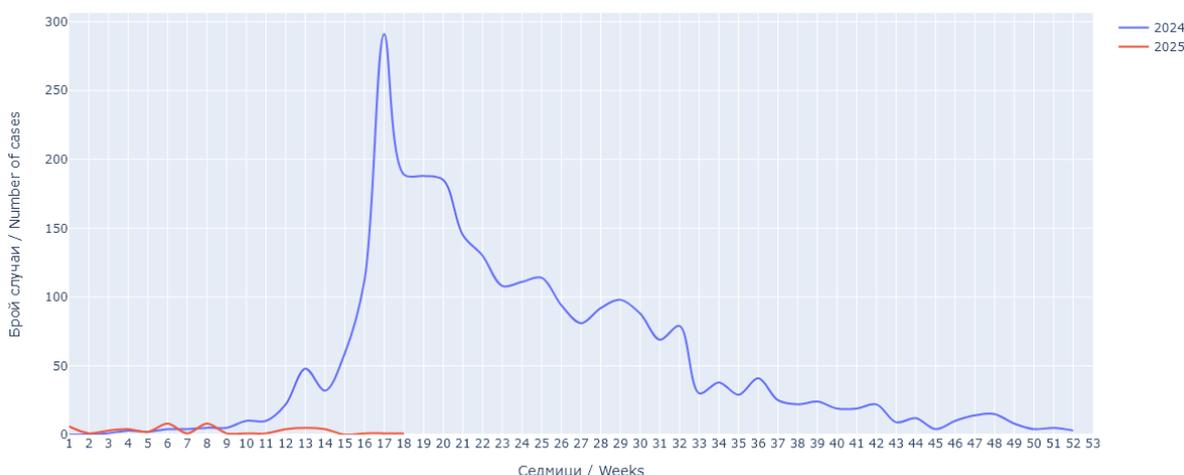

### 9. Pertussis

The number of reported cases of Pertussis during week 18 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 48. For the same period of the previous year the number of reported cases is 743. The deviation from the previous year is (-695).

Регистрирани случаи на Коклюш по седмици в Република България  
Reported number of cases of Pertussis by weeks in Bulgaria

### 10. Leptospirosis

The number of reported cases of Leptospirosis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**11. Botulism**

The number of reported cases of Botulism during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

**12. Yersiniosis**

The number of reported cases of Yersiniosis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-4).

**13. Campylobacteriosis**

The number of reported cases of Campylobacteriosis during week 18 of 2025 is 13. The deviation from the previous week is (0).

The reported cases are classified as: 1 probable and 12 confirmed.

From the beginning of the year the number of reported cases is 86. For the same period of the previous year the number of reported cases is 81. The deviation from the previous year is (5).

**14. Typhoid fever**

The number of reported cases of Typhoid fever during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**15. Legionnaires` disease**

The number of reported cases of Legionnaires` disease during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

**16. Rubella**

The number of reported rubella cases during week No 18 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**17. Congenital rubella**

The number of reported cases of Congenital rubella during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**18. Viral meningitis and meningoencephalitis**

The number of reported cases of Viral meningitis and meningoencephalitis during week 18 of 2025 is 2. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 34. For the same period of the previous year the number of reported cases is 30. The deviation from the previous year is (4).

### 19. Crimean-Congo haemorrhagic fever

The number of reported cases of Crimean-Congo haemorrhagic fever during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

### 20. Mediterranean spotted fever (Boutonneuse fever)

The number of reported cases of Mediterranean spotted fever (Boutonneuse fever) during week 18 of 2025 is 5. The deviation from the previous week is (4). The reported cases are classified as: 2 probable and 3 confirmed. From the beginning of the year the number of reported cases is 8. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (2).

### 21. Meningococcal infection

The number of reported cases of Meningococcal infection during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (7).

### 22. Listeriosis

The number of reported cases of Listeriosis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 5. The deviation from the previous year is (-3).

### 23. Brucellosis

The number of reported cases of Brucellosis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

### 24. Tularaemia

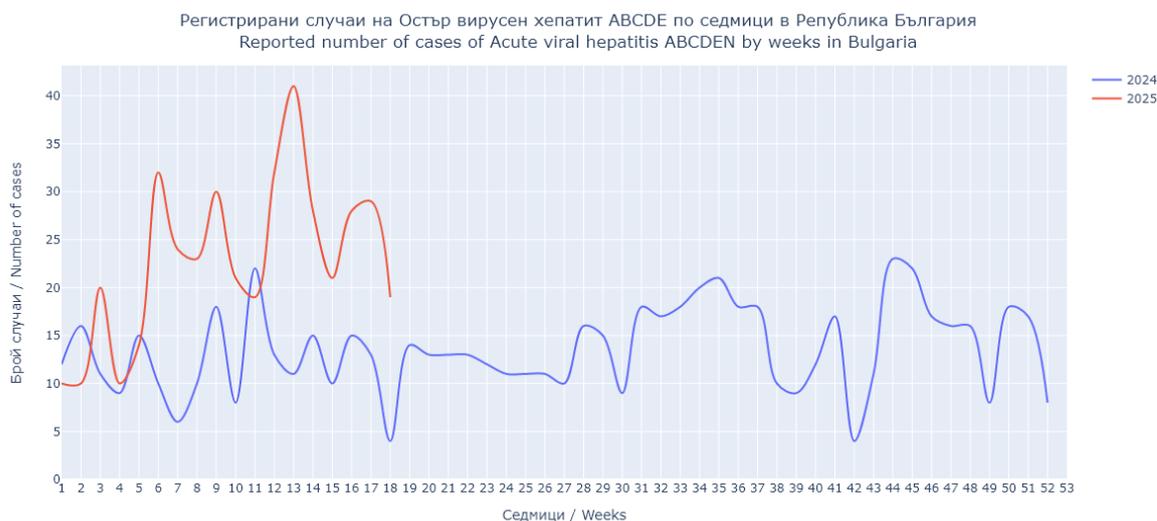

The number of reported cases of Tularaemia during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

## 25. Acute viral hepatitis ABCDEN

The number of reported cases of Acute viral hepatitis ABCDEN during week 18 of 2025 is 19. The deviation from the previous week is (-10).

The reported cases are classified as: 2 possible, 2 probable and 15 confirmed.

From the beginning of the year the number of reported cases is 411. For the same period of the previous year the number of reported cases is 217. The deviation from the previous year is (194).

## 26. Hemorrhagic fever with renal syndrome

The number of reported cases of Hemorrhagic fever with renal syndrome during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0.

For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

## 27. Q fever

The number of reported cases of Q fever during week 18 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 16. For the same period of the previous year the number of reported cases is 12. The deviation from the previous year is (4).

## 28. Ornithosis

The number of reported cases of Ornithosis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

## 29. Tetanus

The number of reported cases of Tetanus during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

## 30. Anthrax

The number of reported cases of Anthrax during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**31. *Pneumococcal meningitis***

The number of reported cases of Pneumococcal meningitis during week 18 of 2025 is 1. The deviation from the previous week is (-1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 14. For the same period of the previous year the number of reported cases is 11. The deviation from the previous year is (3).

**32. *Streptococcal meningitis***

The number of reported cases of Streptococcal meningitis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

**33. *Haemophilus influenzae meningitis***

The number of reported cases of Haemophilus influenzae meningitis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (0).

**34. *Bacterial meningitis (other bacteria)***

The number of reported cases of Bacterial meningitis (other bacteria) during week 18 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 23. For the same period of the previous year the number of reported cases is 21. The deviation from the previous year is (2).

**35. *Rotavirus gastroenteritis***

The number of reported cases of Rotavirus gastroenteritis during week 18 of 2025 is 20. The deviation from the previous week is (5).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 342. For the same period of the previous year the number of reported cases is 156. The deviation from the previous year is (186).

**36. *Measles***

The number of reported measles cases during week No 18 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

**37. *SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)***

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

**38. *West Nile virus***

The number of reported cases of West Nile virus during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

### 39. Tick-borne Encephalitis

The number of reported cases of Tick-borne Encephalitis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

### 40. Pneumococcal invasive disease

The number of reported cases of Pneumococcal invasive disease during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

### 41. Variant of Creutzfeld-Jakob

The number of reported cases of Variant of Creutzfeld-Jakob during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

### 42. COVID-19

The number of reported cases of COVID-19 during week 18 of 2025 is 4. The deviation from the previous week is (-1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 282. For the same period of the previous year the number of reported cases is 5560. The deviation from the previous year is (-5278).

### 43. Lyme neuroborreliosis

The number of reported cases of Lyme neuroborreliosis during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

### 44. Monkeypox

The number of reported cases of Monkeypox during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

#### 45. Denga

The number of reported cases of Denga during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

#### 46. Cholera

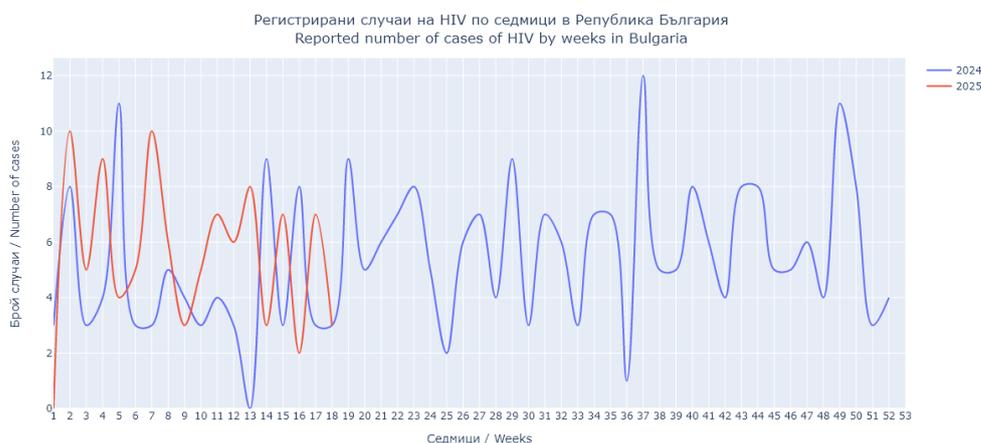

The number of reported cases of Cholera during week 18 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

#### 47. HIV

The number of reported cases of HIV during week 18 of 2025 is 3. The deviation from the previous week is (-4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 108. For the same period of the previous year the number of reported cases is 80. The deviation from the previous year is (28).

#### 48. Gonorrhoea

The number of reported cases of Gonorrhoea during week 18 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 26. For the same period of the previous year the number of reported cases is 35. The deviation from the previous year is (-9).

#### 49. Chlamydial Infection

The number of reported cases of Chlamydial Infection during week 18 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 45. For the same period of the previous year the number of reported cases is 33. The deviation from the previous year is (12).

#### 50. Syphilis

The number of reported cases of Syphilis during week 18 of 2025 is 3. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 126. For the same period of the previous year the number of reported cases is 135. The deviation from the previous year is (-9).

**51. Congenital Syphilis**

The number of reported cases of Congenital Syphilis during week 18 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 12. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (6).
