The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 207. For the same period of the previous year the number of reported cases is 142. The deviation from the previous year is (65).

2. Lyme disease

The number of reported cases of Lyme disease during week 19 of 2025 is 2. The deviation from the previous week is (-4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 70. For the same period of the previous year the number of reported cases is 37. The deviation from the previous year is (33).

3. Gastroenteritis, enterocolitis

The number of reported cases of Gastroenteritis, enterocolitis during week 19 of 2025 is 158. The deviation from the previous week is (9).

The reported cases are classified as: 60 possible, 92 probable and 6 confirmed.

From the beggning of the year the number of reported cases is 2781. For the same period of the previous year the number of reported cases is 2531. The deviation from the previous year is (250).

Регистрирани случаи на Гастроентерит, ентероколит по седмици в Република България
Reported number of cases of Gastroenteritis, enterocolitis by weeks in Bulgaria

4. E. coli infection – escherichiosis (E.coli)

The number of reported cases of E. coli infection – escherichiosis (E.coli) during week 19 of 2025 is 4. The deviation from the previous week is (-4).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 87. For the same period of the previous year the number of reported cases is 92. The deviation from the previous year is (-5).

Регистрирани случаи на Колиентерити (ешерихиози) по седмици в Република България
Reported number of cases of E. coli infection – escherichiosis (E.coli) by weeks in Bulgaria

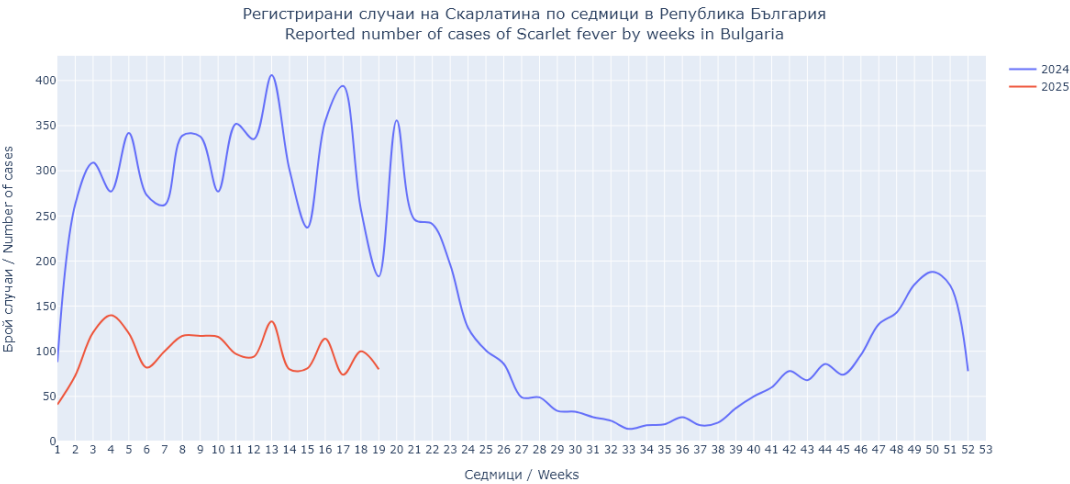

5. Scarlet fever

The number of reported cases of Scarlet fever during week 19 of 2025 is 80. The deviation from the previous week is (-20).

The reported cases are classified as: 25 possible, 33 probable and 22 confirmed.

From the beggning of the year the number of reported cases is 1880. For the same period of the previous year the number of reported cases is 5545. The deviation from the previous year is (-3665).

6. Varicella

The number of reported cases of Varicella during week 19 of 2025 is 437. The deviation from the previous week is (-138).
The reported cases are classified as: 47 possible, 326 probable and 64 confirmed.
From the beggning of the year the number of reported cases is 11623. For the same period of the previous year the number of reported cases is 14978.The deviation from the previous year is (-3355).

7. Shigellosis

The number of reported cases of Shigellosis during week 19 of 2025 is 0. The deviation from the previous week is (-1). From the beggning of the year the number of reported cases is 7. For the same period of the previous year the number of reported cases is 13.The deviation from the previous year is (-6).

8. Mumps

The number of reported mumps cases during week No 19 of year 2025 is 0. The deviation from the previous week is (0).From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (-9).

9. Pertussis

The number of reported cases of Pertussis during week 19 of 2025 is 0. The deviation from the previous week is (-1). From the beggning of the year the number of reported cases is 48. For the same period of the previous year the number of reported cases is 936.The deviation from the previous year is (-888).

10. Leptospirosis

The number of reported cases of Leptospirosis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1.The deviation from the previous year is (-1).

11. Botulism

The number of reported cases of Botulism during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

12. Yersiniosis

The number of reported cases of Yersiniosis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-4).

13. Campylobacteriosis

The number of reported cases of Campylobacteriosis during week 19 of 2025 is 4. The deviation from the previous week is (-9).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 90. For the same period of the previous year the number of reported cases is 87. The deviation from the previous year is (3).

14. Typhoid fever

The number of reported cases of Typhoid fever during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

15. Legionnaires` disease

The number of reported cases of Legionnaires` disease during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

16. Rubella

The number of reported rubella cases during week No 19 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

17. Congenital rubella

The number of reported cases of Congenital rubella during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

18. Viral meningitis and meningoencephalitis

The number of reported cases of Viral meningitis and meningoencephalitis during week 19 of 2025 is 1. The deviation from the previous week is (-1).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 35. For the same period of the previous year the number of reported cases is 31. The deviation from the previous year is (4).

Регистрирани случаи на Вирусни менингити и менингоенцефалити по седмици в Република България
Reported number of cases of Viral meningitis and meningoencephalitis by weeks in Bulgaria

19. *Crimean-Congo haemorrhagic fever*

The number of reported cases of Crimean-Congo haemorrhagic fever during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

20. *Mediterranean spotted fever (Boutonneuse fever)*

The number of reported cases of Mediterranean spotted fever (Boutonneuse fever) during week 19 of 2025 is 2. The deviation from the previous week is (-3). The reported cases are classified as 1 probable and 1 confirmed. From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (2).

21. *Meningococcal infection*

The number of reported cases of Meningococcal infection during week 19 of 2025 is 1. The deviation from the previous week is (1). The reported cases are classified as confirmed. From the beginning of the year the number of reported cases is 11. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (8).

22. *Listeriosis*

The number of reported cases of Listeriosis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 5. The deviation from the previous year is (-3).

23. *Brucellosis*

The number of reported cases of Brucellosis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

24. Tularaemia

The number of reported cases of Tularaemia during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

25. Acute viral hepatitis ABCDEN

The number of reported cases of Acute viral hepatitis ABCDEN during week 19 of 2025 is 23. The deviation from the previous week is (4).

The reported cases are classified as: 3 possible, 1 probable and 19 confirmed.

From the beginning of the year the number of reported cases is 434. For the same period of the previous year the number of reported cases is 231. The deviation from the previous year is (203).

26. Hemorrhagic fever with renal syndrome

The number of reported cases of Hemorrhagic fever with renal syndrome during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

27. Q fever

The number of reported cases of Q fever during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 16. For the same period of the previous year the number of reported cases is 12. The deviation from the previous year is (4).

28. Ornithosis

The number of reported cases of Ornithosis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

29. Tetanus

The number of reported cases of Tetanus during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

30. Anthrax

The number of reported cases of Anthrax during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

31. Pneumococcal meningitis

The number of reported cases of Pneumococcal meningitis during week 19 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 15. For the same period of the previous year the number of reported cases is 12. The deviation from the previous year is (3).

32. Streptococcal meningitis

The number of reported cases of Streptococcal meningitis during week 19 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (2).

33. Haemophilus influenzae meningitis

The number of reported cases of Haemophilus influenzae meningitis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (0).

34. Bacterial meningitis (other bacteria)

The number of reported cases of Bacterial meningitis (other bacteria) during week 19 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 24. For the same period of the previous year the number of reported cases is 24. The deviation from the previous year is (0).

35. Rotavirus gastroenteritis

The number of reported cases of Rotavirus gastroenteritis during week 19 of 2025 is 7. The deviation from the previous week is (-13).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 349. For the same period of the previous year the number of reported cases is 183. The deviation from the previous year is (166).

36. Measles

The number of reported measles cases during week No 19 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

37. SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

38. West Nile virus

The number of reported cases of West Nile virus during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

39. Tick-borne Encephalitis

The number of reported cases of Tick-borne Encephalitis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

40. Pneumococcal invasive disease

The number of reported cases of Pneumococcal invasive disease during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

41. Variant of Creutzfeldt-Jakob

The number of reported cases of Variant of Creutzfeldt-Jakob during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

42. COVID-19

The number of reported cases of COVID-19 during week 19 of 2025 is 8. The deviation from the previous week is (4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 290. For the same period of the previous year the number of reported cases is 5584. The deviation from the previous year is (-5294).

43. Lyme neuroborreliosis

The number of reported cases of Lyme neuroborreliosis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0.The deviation from the previous year is (0).

44. Monkeypox

The number of reported cases of Monkeypox during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0.The deviation from the previous year is (2).

45. Denga

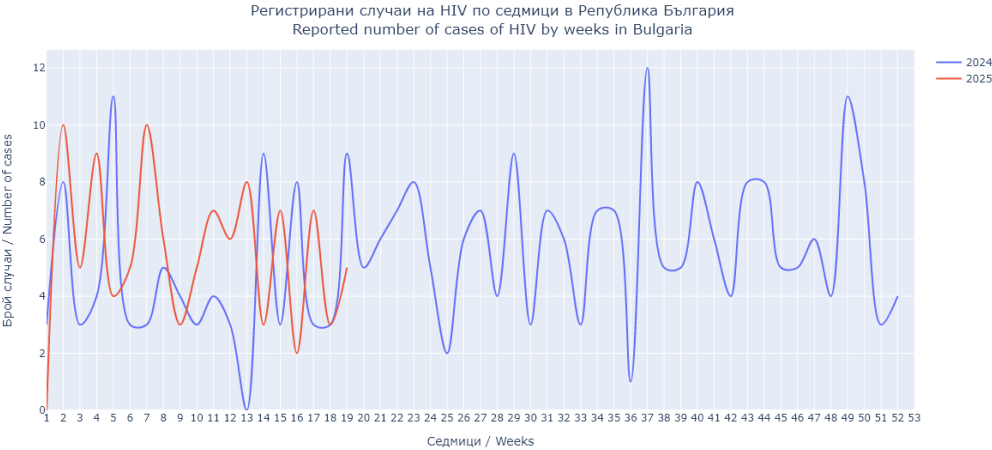

The number of reported cases of Denga during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3.The deviation from the previous year is (-1).

46. Cholera

The number of reported cases of Cholera during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0.The deviation from the previous year is (0).

47. HIV

The number of reported cases of HIV during week 19 of 2025 is 5. The deviation from the previous week is (2).
The reported cases are classified as confirmed.
From the beggning of the year the number of reported cases is 113. For the same period of the previous year the number of reported cases is 89.The deviation from the previous year is (24).

48. Gonorrhea

The number of reported cases of Gonorrhea during week 19 of 2025 is 2. The deviation from the previous week is (2).
The reported cases are classified as confirmed.
From the beggning of the year the number of reported cases is 28. For the same period of the previous year the number of reported cases is 35.The deviation from the previous year is (-7).

49. Chlamydial Infection

The number of reported cases of Chlamydial Infection during week 19 of 2025 is 2. The deviation from the previous week is (2).
The reported cases are classified as confirmed.
From the beggning of the year the number of reported cases is 47. For the same period of the previous year the number of reported cases is 34.The deviation from the previous year is (13).

50. Syphilis

The number of reported cases of Syphilis during week 19 of 2025 is 2. The deviation from the previous week is (-1).
The reported cases are classified as confirmed.
From the beggning of the year the number of reported cases is 128. For the same period of the previous year the number of reported cases is 137.The deviation from the previous year is (-9).

51. Congenital Syphilis

The number of reported cases of Congenital Syphilis during week 19 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 12. For the same period of the previous year the number of reported cases is 6.The deviation from the previous year is (6).
