

OPERATIONAL ANALYSIS OF WEEKLY INFORMATION ON COMMUNICABLE DISEASES IN BULGARIA

Week 20 (12.05.2025 – 18.05.2025)

1. Salmonellosis

The number of reported cases of Salmonellosis during week 20 of 2025 is 13. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 220. For the same period of the previous year the number of reported cases is 160. The deviation from the previous year is (60).

2. Lyme disease

The number of reported cases of Lyme disease during week 20 of 2025 is 5. The deviation from the previous week is (3).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 75. For the same period of the previous year the number of reported cases is 42. The deviation from the previous year is (33).

3. Gastroenteritis, enterocolitis

The number of reported cases of Gastroenteritis, enterocolitis during week 20 of 2025 is 152. The deviation from the previous week is (-6).

The reported cases are classified as: 66 possible, 81 probable and 5 confirmed.

From the beggning of the year the number of reported cases is 2933. For the same period of the previous year the number of reported cases is 2699. The deviation from the previous year is (234).

4. *E. coli* infection – escherichiosis (*E.coli*)

The number of reported cases of *E. coli* infection – escherichiosis (*E.coli*) during week 20 of 2025 is 5. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 92. For the same period of the previous year the number of reported cases is 96. The deviation from the previous year is (-4).

5. *Scarlet fever*

The number of reported cases of Scarlet fever during week 20 of 2025 is 121. The deviation from the previous week is (41).

The reported cases are classified as: 41 possible, 51 probable and 29 confirmed.

From the beggning of the year the number of reported cases is 2001. For the same period of the previous year the number of reported cases is 5871. The deviation from the previous year is (-3870).

6. Varicella

The number of reported cases of Varicella during week 20 of 2025 is 677. The deviation from the previous week is (240).

The reported cases are classified as: 66 possible, 565 probable and 46 confirmed.

From the beggning of the year the number of reported cases is 12300. For the same period of the previous year the number of reported cases is 15944. The deviation from the previous year is (-3644).

7. Shigellosis

The number of reported cases of Shigellosis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 7. For the same period of the previous year the number of reported cases is 13. The deviation from the previous year is (-6).

8. Mumps

The number of reported mumps cases during week No 20 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (-9).

9. Pertussis

The number of reported cases of Pertussis during week 20 of 2025 is 3. The deviation from the previous week is (3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 51. For the same period of the previous year the number of reported cases is 1125. The deviation from the previous year is (-1074).

10. Leptospirosis

The number of reported cases of Leptospirosis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

11. Botulism

The number of reported cases of Botulism during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

12. Yersiniosis

The number of reported cases of Yersiniosis during week 20 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 5. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-3).

13. Campylobacteriosis

The number of reported cases of Campylobacteriosis during week 20 of 2025 is 15. The deviation from the previous week is (11).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 105. For the same period of the previous year the number of reported cases is 95. The deviation from the previous year is (10).

14. Typhoid fever

The number of reported cases of Typhoid fever during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

15. Legionnaires` disease

The number of reported cases of Legionnaires` disease during week 20 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (0).

16. Rubella

The number of reported rubella cases during week No 20 of year 2025 is 1. The deviation from the previous week is (1). The reported case is classified as possible. From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

17. Congenital rubella

The number of reported cases of Congenital rubella during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

18. Viral meningitis and meningoencephalitis

The number of reported cases of Viral meningitis and meningoencephalitis during week 20 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 36. For the same period of the previous year the number of reported cases is 33. The deviation from the previous year is (3).

19. Crimean-Congo haemorrhagic fever

The number of reported cases of Crimean-Congo haemorrhagic fever during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

20. Mediterranean spotted fever (*Boutonneuse fever*)

The number of reported cases of Mediterranean spotted fever (*Boutonneuse fever*) during week 20 of 2025 is 5. The deviation from the previous week is (3).

The reported cases are classified as: 2 probable and 3 confirmed.

From the beggning of the year the number of reported cases is 15. For the same period of the previous year the number of reported cases is 11. The deviation from the previous year is (4).

21. Meningococcal infection

The number of reported cases of Meningococcal infection during week 20 of 2025 is 0. The deviation from the previous week is (-1). From the beggning of the year the number of reported cases is 11. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (7).

22. Listeriosis

The number of reported cases of Listeriosis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (-4).

23. Brucellosis

The number of reported cases of Brucellosis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

24. Tularaemia

The number of reported cases of Tularaemia during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

25. Acute viral hepatitis ABCDEN

The number of reported cases of Acute viral hepatitis ABCDEN during week 20 of 2025 is 25. The deviation from the previous week is (2).

The reported cases are classified as: 2 possible, 2 probable and 21 confirmed.

From the beggning of the year the number of reported cases is 459. For the same period of the previous year the number of reported cases is 243. The deviation from the previous year is (216).

26. Hemorrhagic fever with renal syndrome

The number of reported cases of Hemorrhagic fever with renal syndrome during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

27. Q fever

The number of reported cases of Q fever during week 20 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 17. For the same period of the previous year the number of reported cases is 12. The deviation from the previous year is (5).

28. Ornithosis

The number of reported cases of Ornithosis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

29. Tetanus

The number of reported cases of Tetanus during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

30. Anthrax

The number of reported cases of Anthrax during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

31. Pneumococcal meningitis

The number of reported cases of Pneumococcal meningitis during week 20 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 16. For the same period of the previous year the number of reported cases is 12. The deviation from the previous year is (4).

32. Streptococcal meningitis

The number of reported cases of Streptococcal meningitis during week 20 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 3. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (2).

33. Haemophilus influenzae meningitis

The number of reported cases of Haemophilus influenzae meningitis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (0).

34. Bacterial meningitis (other bacteria)

The number of reported cases of Bacterial meningitis (other bacteria) during week 20 of 2025 is 2. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 26. For the same period of the previous year the number of reported cases is 25. The deviation from the previous year is (1).

35. Rotavirus gastroenteritis

The number of reported cases of Rotavirus gastroenteritis during week 20 of 2025 is 15. The deviation from the previous week is (8).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 364. For the same period of the previous year the number of reported cases is 203. The deviation from the previous year is (161).

36. Measles

The number of reported measles cases during week No 20 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

37. SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

38. West Nile virus

The number of reported cases of West Nile virus during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

39. Tick-borne Encephalitis

The number of reported cases of Tick-borne Encephalitis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

40. Pneumococcal invasive disease

The number of reported cases of Pneumococcal invasive disease during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

41. Variant of Creutzfeldt-Jakob

The number of reported cases of Variant of Creutzfeldt-Jakob during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

42. COVID-19

The number of reported cases of COVID-19 during week 20 of 2025 is 8. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 298. For the same period of the previous year the number of reported cases is 5608. The deviation from the previous year is (-5310).

43. Lyme neuroborreliosis

The number of reported cases of Lyme neuroborreliosis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

44. Monkeypox

The number of reported cases of Monkeypox during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

45. Denga

The number of reported cases of Denga during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (-2).

46. Cholera

The number of reported cases of Cholera during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beggning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

47. HIV

The number of reported cases of HIV during week 20 of 2025 is 6. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beggning of the year the number of reported cases is 119. For the same period of the previous year the number of reported cases is 94. The deviation from the previous year is (25).

48. Gonorrhea

The number of reported cases of Gonorrhea during week 20 of 2025 is 0. The deviation from the previous week is (-2). From the beginning of the year the number of reported cases is 28. For the same period of the previous year the number of reported cases is 36. The deviation from the previous year is (-8).

49. Chlamydial Infection

The number of reported cases of Chlamydial Infection during week 20 of 2025 is 2. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 49. For the same period of the previous year the number of reported cases is 37. The deviation from the previous year is (12).

50. Syphilis

The number of reported cases of Syphilis during week 20 of 2025 is 3. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 131. For the same period of the previous year the number of reported cases is 142. The deviation from the previous year is (-11).

51. Congenital Syphilis

The number of reported cases of Congenital Syphilis during week 20 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 12. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (6).
